Deleting: There are two kinds of deletion operations, depending on whether you want to delete a single file or the entire archive entry. Deleting a single file could be useful if you want to replace an old version of a paper with a newer version without re-entering author or title information. It could also be useful if you have posted your paper in multiple formats (say, a PDF version along side a PostScript version), and you want to keep one and get rid of the other. (To upload a second version of the same paper, use the "Upload an additional file" link above.)

If you want to delete a single file, place the *filename* (not the paper title!) in the text box below and click "delete". (You can find out what the relevant filename is by clicking on "Examine the folder" above.)

Delete a single file:

If, on the other hand, you want to delete the entire entry from the the archive, click on the pink button below.

[Delete the entire folder forever \(i.e., the entire item with all of its individual files\)](#)
